EXPERIENCE

- **GitHub, Inc.** (https://github.com) 04/2023 —
  GitHub Campus Expert
    – Lead a software development community at my campus, focusing on spreading open source.
    – Organise events to promote collaborative development open to all majors at my university.
    – Create inclusive and safe spaces for students to share programming resources and technology.
- **Re-Volt: OpenGL** (https://rvgl.org) 01/2022 —
  Software Developer
  Core Maintainer Team Member
    – Work with a remote team of developers to continuously release new game updates.
    – Write documentation for new game patches.
    – Interact with the game's community of over 5000 players to resolve bugs and add new features.
    – Actively work with GitHub and GitLab to maintain the game's codebase and workflows.
    – Implement synchronisation fixes to the multiplayer aspect of the game.
- **Re-Volt America** (https://rva.lat) 05/2021 —
  Lead Software Developer
    – Maintain and deploy a community website which serves thousands of visitors every month.
    – Write workflows to automate content distribution via GitHub actions.
    – Review and merge new content updates via GitHub pull requests.
  Community Manager
    – Write announcement posts for the community covering recent content updates.
    – Interact with the community to recollect feedback and ideas for improving content distribution.

EDUCATION

- **University of the Bío-Bío** 2020 — 2024
  Execution Engineering in Computing and Informatics

SPEAKING

- **Git/GitHub Workshop** (Concepción, Chile) 08/2023
  Presented Git and GitHub's fundamentals, alongside a practical activity for attendees to use Git.

- **Ruby on Rails Workshop** (Concepción, Chile) 09/2023
  Introduced Ruby on Rails for full-stack web development, as well as practical examples and applied
  exercises for attendees to get hands-on experience with Ruby and Ruby on Rails.
